

Usage of McIDAS-V with GOES-R AWG products

William Straka III
UW/CIMSS
Madison, Wisconsin, USA

With help from Tom Rink (CIMSS/SSEC), Tom Achtor (CIMSS/SSEC), and Tim Schmit
(NOAA/NESDIS)

Acknowledgements

We would like to acknowledge the efforts of several people in providing the data from the GOES-R AIT framework for testing

Walter Wolf¹, Shanna Sampson², Qingzhao Guo², Gang Fu², Aiwu Li², Meizhu Fan²,
Shuang Qiu², Zhaohui Cheng²

¹ NOAA/NESDIS/STAR

²IMSG/Dell

In addition, we would like to acknowledge the GOES-R AWG teams who created these algorithms, EUMETSAT for the SEVIRI data and NASA EOS for the MODIS data.

Further thanks goes to the GOES-R Imagery AWG for providing the simulated AWG data and to Tom Rink for implementing the GOES-R Fixed Grid Format in to McIDAS-V

Status of GOES-R product Visualization in McIDAS-V

- Currently all of the 80% code delivery ABI Baseline Products are able to be visualized in McIDAS-V
- As files from the 100% code delivery become available for the Baseline products, the output is being tested and visualized in McIDAS-V. The Option 2 products, which are at their 80% code delivery are also being tested as they become available. Comments on any issues are then sent back to the GOES-R AIT
- McIDAS-V can visualize simulated ABI data in the GOES-R Fixed Grid Format

Status of GOES-R product Visualization in McIDAS-V

- A request was sent in December 2010 to the GOES-R AWG teams to gather enhancements for the various products.
- As they become available, the enhancements are tested and passed along to the McIDAS-V team for integration into McIDAS-V.
- The status of what enhancements have been integrated is available online to both the AIT as well as McIDAS-V teams

ABI/GLM GOES-R product List

BASELINE Products

OPTION 2 Products

Advanced Baseline Imager (ABI)

- Clouds and Moisture Imagery (KPP)
- Clear Sky Mask
- Cloud Top Pressure and Height
- Cloud Top Phase
- Cloud Top Temperature
- Cloud Particle Size Distribution
- Cloud Optical Path
- Temperature and Moisture Profiles
- Total Precipitable Water
- Stability Parameters (Lifted Index)
- Aerosol Detection
- Aerosols Optical Depth
- Derived Motion Winds
- Hurricane Intensity
- Fire/Hot Spot Characterization
- Land and Sea Surface Temperature
- Volcanic Ash
- Rainfall Rate
- Snow Cover
- Downward Solar Insolation: Surface
- Reflected Solar Insolation: TOA

GLM

- Lightning Detection

Advanced Baseline Imager (ABI)

- Cloud Layer/Heights
- Cloud Ice Water Path
- Cloud Liquid Water
- Cloud Type
- Convective Initiation
- Turbulence
- Low Cloud and Fog
- Enhanced "V"/Overshooting Top
- Aircraft Icing Threat
- SO₂ Detections (Volcanoes)
- Visibility
- Upward Longwave Radiation (TOA)
- Downward Longwave Radiation (SFC)
- Upward Longwave Radiation (SFC)
- Total Ozone
- Aerosol Particle Size
- Surface Emissivity
- Surface Albedo
- Vegetation Index
- Vegetation Fraction
- Flood Standing Water
- Rainfall probability and potential
- Snow Depth
- Ice Cover
- Sea & Lake Ice Concentration, Age, Extent, Motion
- Ocean Currents, Currents: Offshore

GOES-R product images

- Most of the GOES-R products have been using SEVIRI as a proxy dataset . Others have used MODIS or simulated data as a proxy data
- The following images show products either from the Framework runs of from PG efforts in order to demonstrate the enhancements and abilities of McIDAS-V
- Unless otherwise noted, all images use data from the 80% code delivery

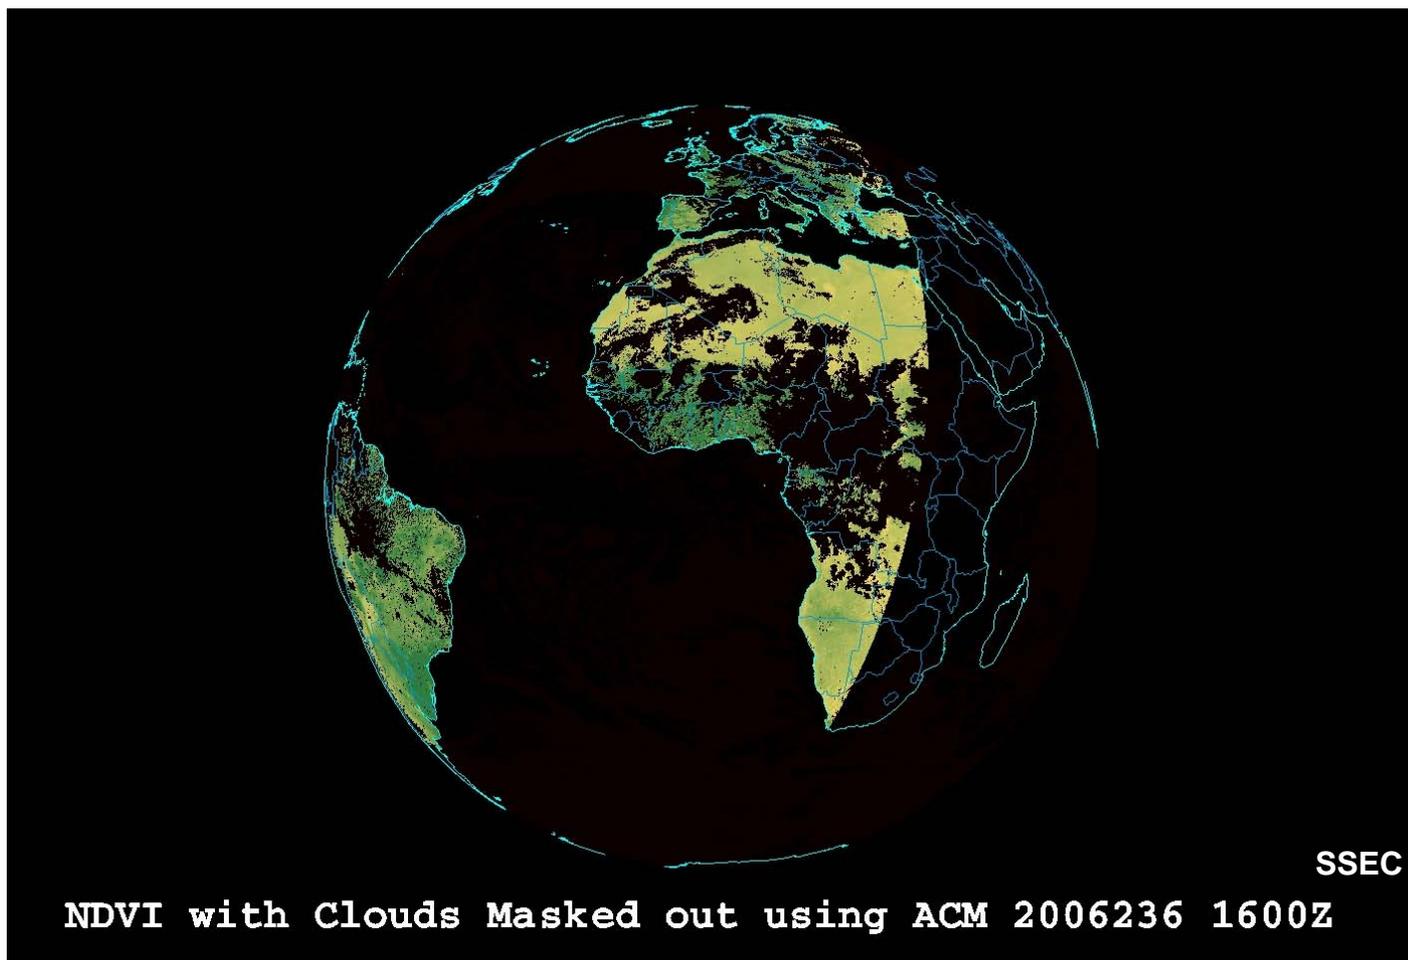

GOES-R LST

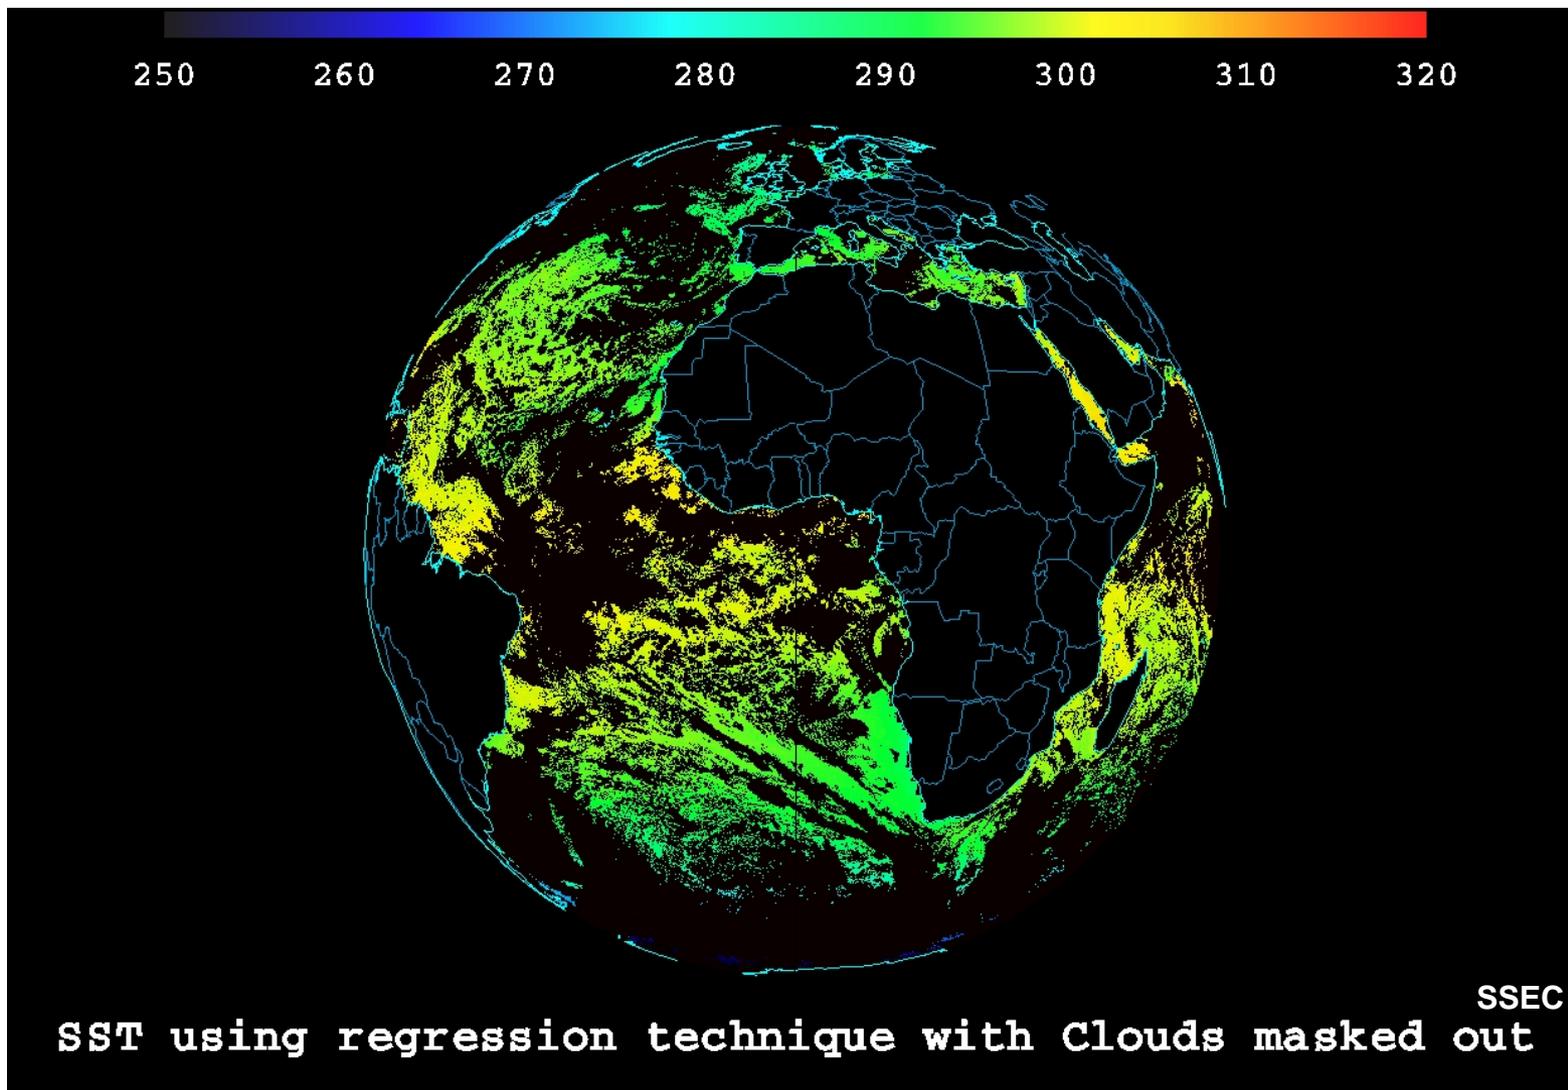

GOES-R NDVI

Clouds masked using ACM

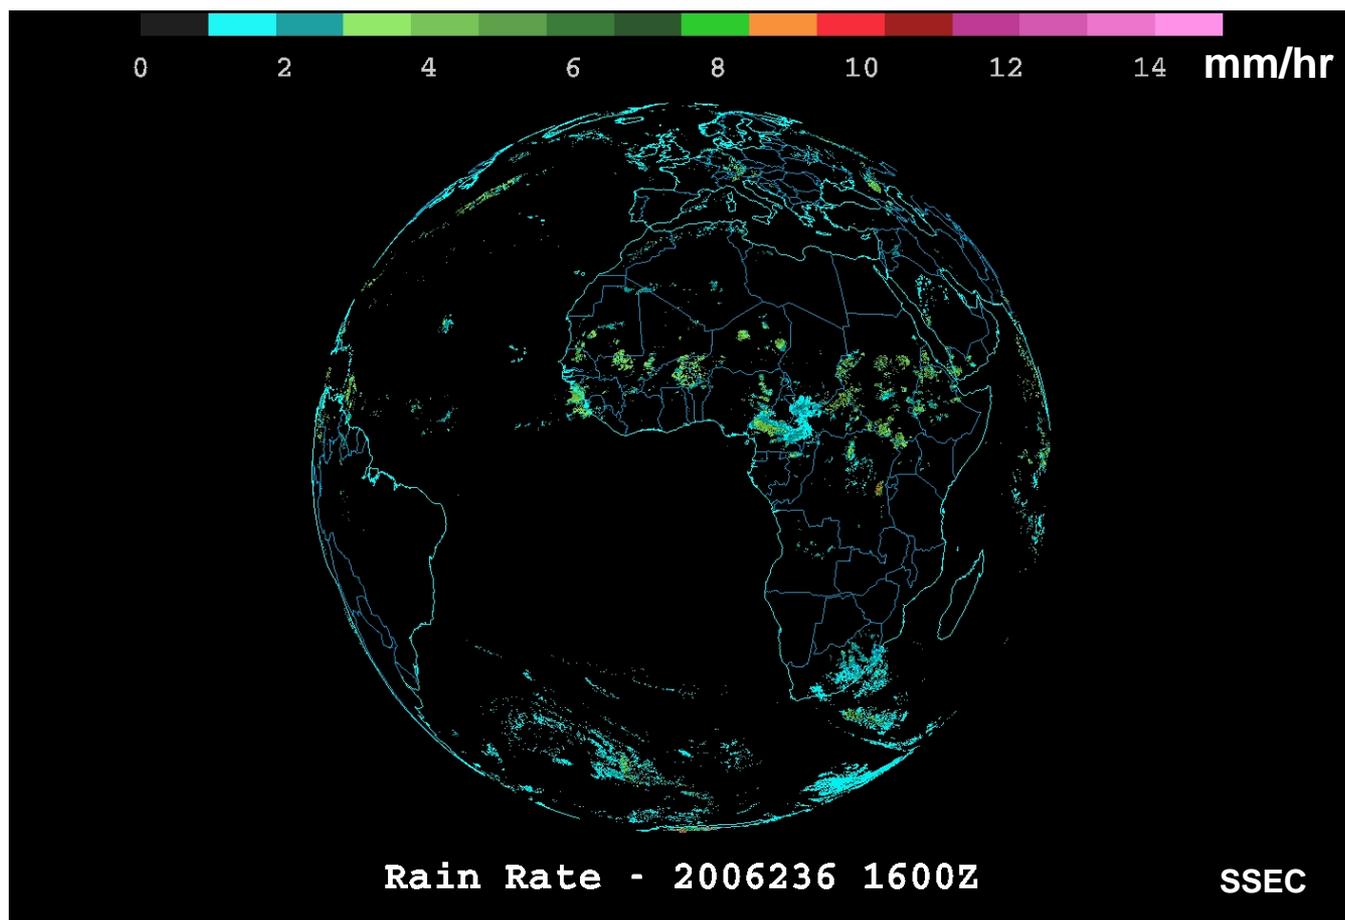

GOES-R SST using regression technique

GOES-R 100% ACM

MET-8, 0.64 Ref w/ 100% ACM, 2006-08-01 12:30:00Z SSEC

GOES-R Volcanic Ash Product 5/5/10 Eyjafjallajökull, Iceland

Vol Ash Data provided by Michael Pavolonis (NOAA/NESDIS/STAR)
EUMETSAT Ash Enhancement provided by Hans Peter, EUMETSAT

Other Simulated datasets

- McIDAS-V has not only been used to visualize the GOES-R AWG product, but has also been used to demonstrate the improved resolution capability of GOES-R
- The usages of side-by-side panels is useful in demonstrating the resolution differences in the ABI resolution as compared to current GOES

Side by side analysis animation 4km vs 2km HRIT for MTSAT-1R Thanks to JMA for providing the 2km HRIT data

Summary of ABI products in McIDAS-V

- All of the ABI Baseline Products are able to be visualized in McIDAS-V
 - We are currently working towards visualizing the GLM products as well.

Summary of ABI products in McIDAS-V

- As they become available, Option 2 products are being tested in McIDAS-V
- We are making a concerted effort to gather the enhancements that are used by the various AWG teams.

Questions?
