CALL FOR PRESENTATIONS

The second Community Satellite Processing Package (CSPP) and International MODIS/AIRS Processing Package (IMAPP) Users' Group Meeting will be held in Darmstadt, Germany from 14-16 April 2015 at the European Organization for the Exploitation of Meteorological Satellites (EUMETSAT). The goal of the meeting is to bring together the worldwide community of CSPP and IMAPP users to discuss issues relevant to reception, processing, and applications of data acquired by direct broadcast from Suomi NPP, Terra, Aqua, POES, and Metop. Presentations related to other satellite missions including GCOM-W1, FY-3, and Meteor-M are also welcome. Topics for discussion may include:

- Local usage and applications of CSPP and IMAPP products from VIIRS, CrIS, ATMS, MODIS, AIRS, and AMSU;
- CSPP and IMAPP software technical topics, including related software packages;
- Status of current and future polar environmental satellite missions and sensors;
- Providing feedback and guidance to the CSPP and IMAPP development teams on current products and future priorities;
- Satellite data analysis and visualization applications (e.g., Polar2Grid)

In addition, a special session is planned on the new sensors and plans for direct broadcast on the Metop-SG mission, the second generation of EUMETSAT's Metop satellites, which is set to debut around 2021.

ABSTRACT SUBMISSION DEADLINE: 13 FEBRUARY 2015

Please submit your abstract when you register for the meeting at the website shown above. Abstracts submitted by 13 February 2015 will be considered for the technical program, to be announced by 9 March 2015.
