

# Performance and Application of CSPP/IMAPP in East China

**Yan-An Liu<sup>1</sup>, Wei Gao<sup>1</sup>, Runhe Shi<sup>1</sup>, Allen Huang<sup>2</sup>, Kathy Strabala<sup>2</sup>, Liam Gumley<sup>2</sup>**

**1. East China Normal University    2. University of Wisconsin-Madison**

# Outline

PART 1 System and Performance

PART 2 Research and Application

PART 3 Development Plan

# PART 1

---

## System and Performance

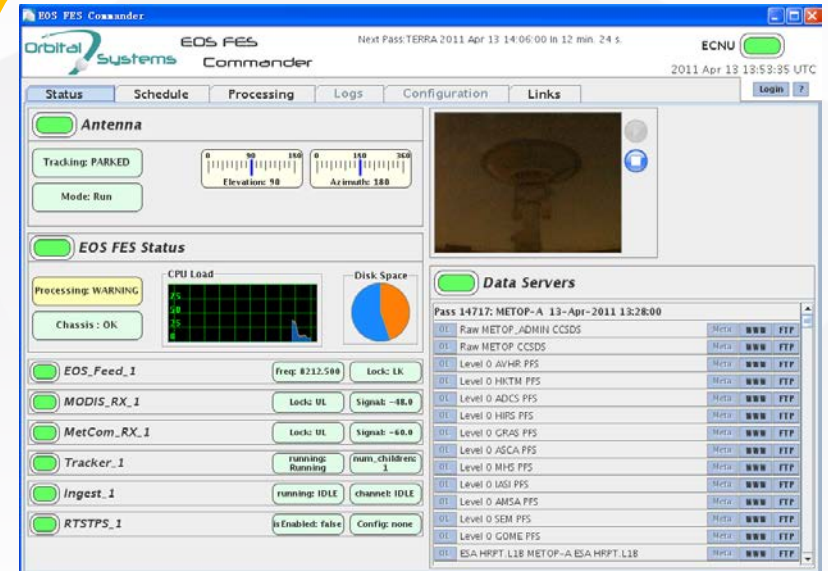

# System and Performance

## Installation: Direct Broadcast (DB) Satellite Receiving and Processing System

Located at ECNU Science Bld A

EOS FES Commander Status

DB Receiving System: X & L dual bands for US, EU and China DB satellites

DBPS: real-time retrieval of atmosphere, ocean and land parameters

# System and Performance

Training: Operation and Theory of IMAPP/CSPP

# System and Performance

## IMAPP/CSPP Real-time Products

First Images Terra MODIS (0235 UTC, 25 May, 2010)

**Infrared**

**Visible**

**True color**

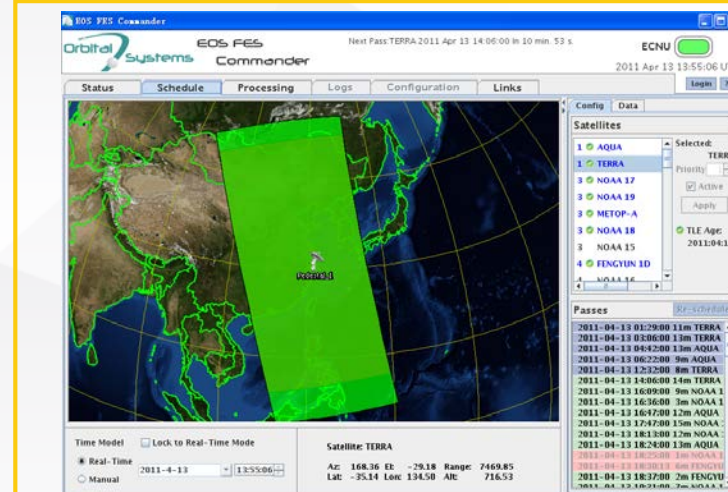

**AOD**

**Water Vapor**

**SST**

**EOS FES  
Commander  
Schedule :**

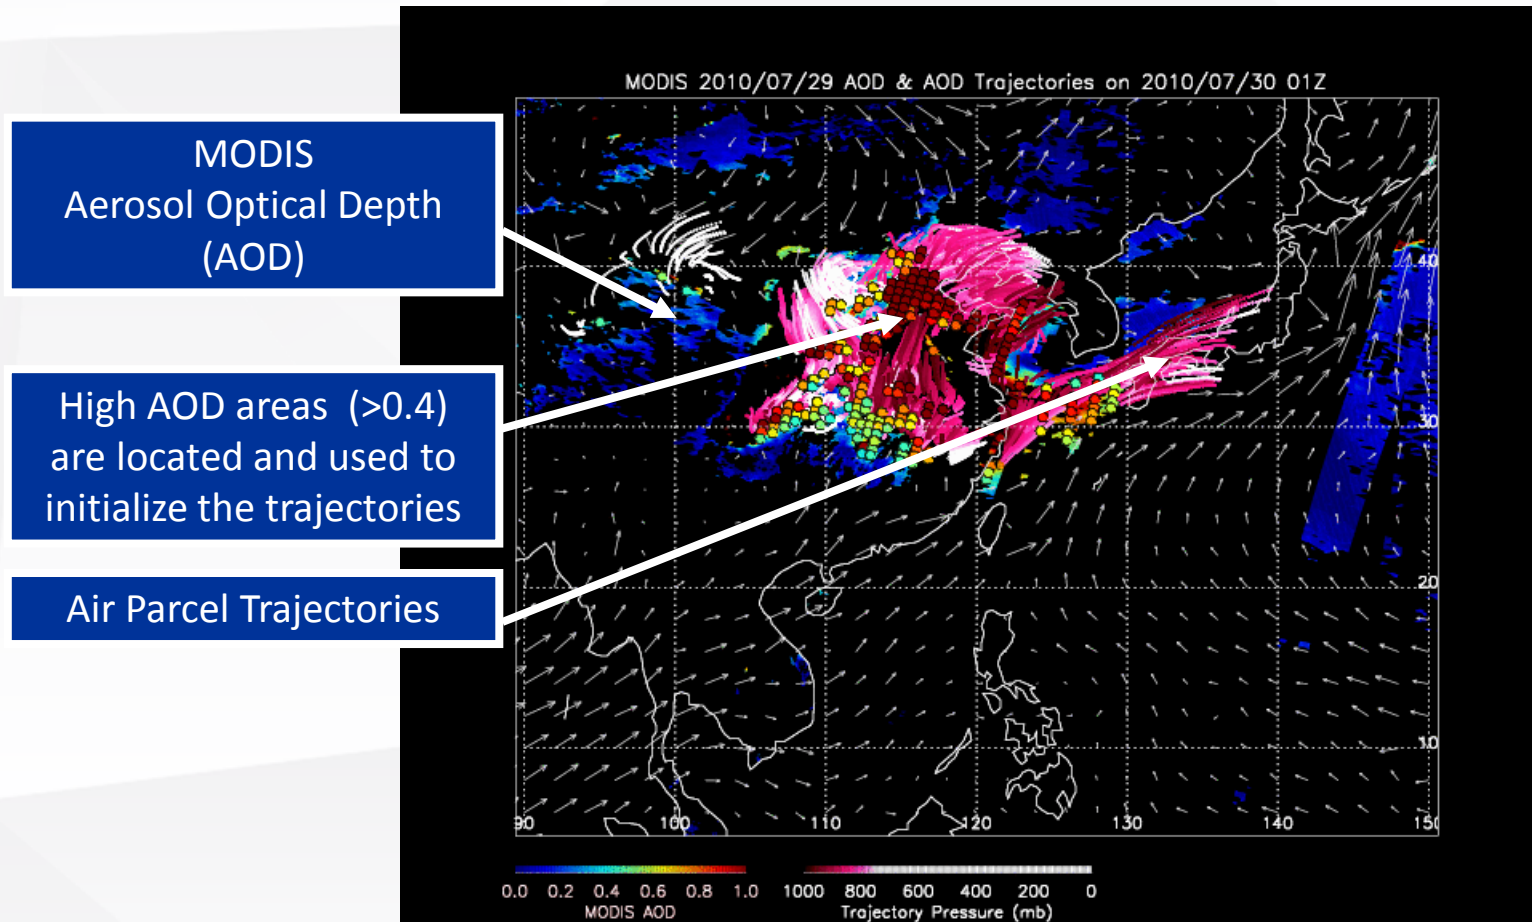

**Configure the  
priority of satellites**

# System and Performance

## IDEA-I

Infusing satellite **D**ata into **E**nvironmental air quality **A**pplications

- ❖ The air parcel trajectories run using the 12Z NOAA/NCEP GFS forecast data providing a **48hr forecast via trajectories**
- ❖ The **pressure levels** of the trajectories are plotted in mb and **colored to a magenta-white scale**. White indicates that the air parcel no longer affects the surface
- ❖ The **850mb wind field vectors** are plotted to show wind direction and speed.

The trajectory forecast animation displays the most important components of an aerosol forecasts

# System and Performance

DBCRA

Direct Broadcast CIMSS Regional Assimilation System

11μm Bright Temperature Image

Relative Humidity

850mb Temperature Fields

Precipitable Water

- ❖ DBCRAS can assimilate direct broadcast products from MODIS, including **Total Precipitable Water** and **Cloud Top Pressure**
- ❖ DBCRAS configuration: **48km** resolution with **38 sigma levels**; **12hr spin-up** with 5-7 MODIS inserts and **72hr forecast** length
- ❖ DBCRAS includes **16km nest** for high-resolution 48hr forecast
- ❖ The system can generate forecast **images and animations** of different meteorological fields for real-time application

# PART 2

---

## Research and Application

# Research and Application

Shanghai (East China): Economic center, Densely populated, and Coastal city

CSPP/IMAPP

Product

Model

Applications

Air  
Quality

❖ Air quality monitoring and forecasting  
with direct broadcast RS data

---

❖ Typhoon forecasting with Direct Broadcast  
CIMSS Regional Assimilation System

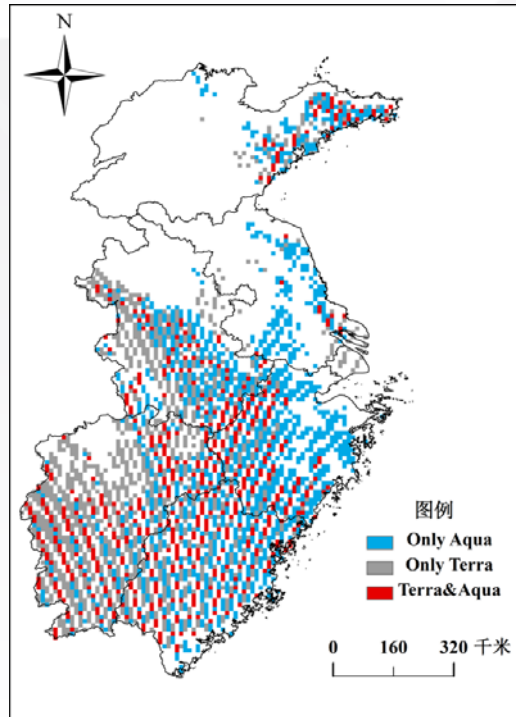

---

Typhoon

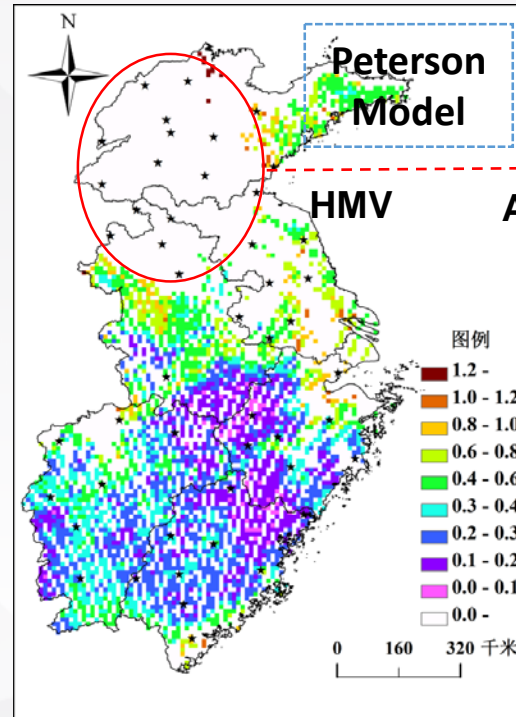

# Research and Application

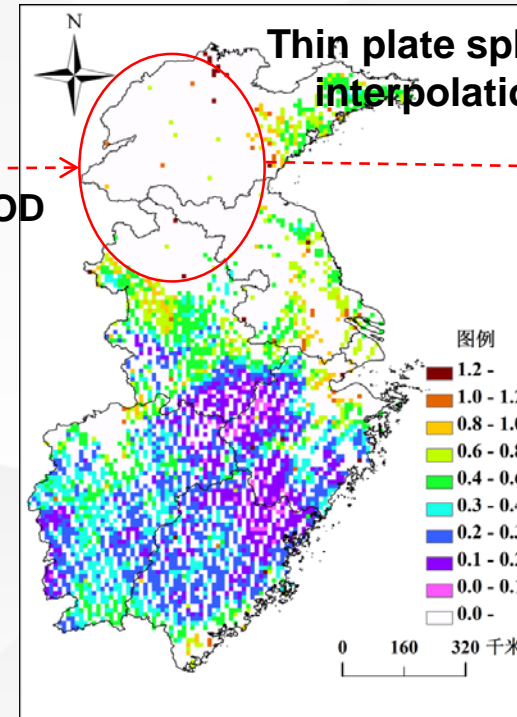

## Air Quality: Data Fusion of Aerosol Optical Depth

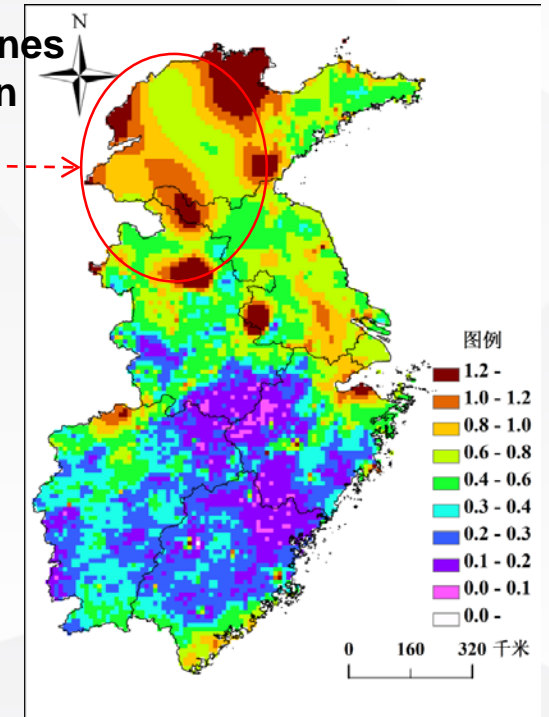

Distribution of Aqua and Terra AOD

Distribution of HMV\* data from observation sites (stars)

Model conversion fusion

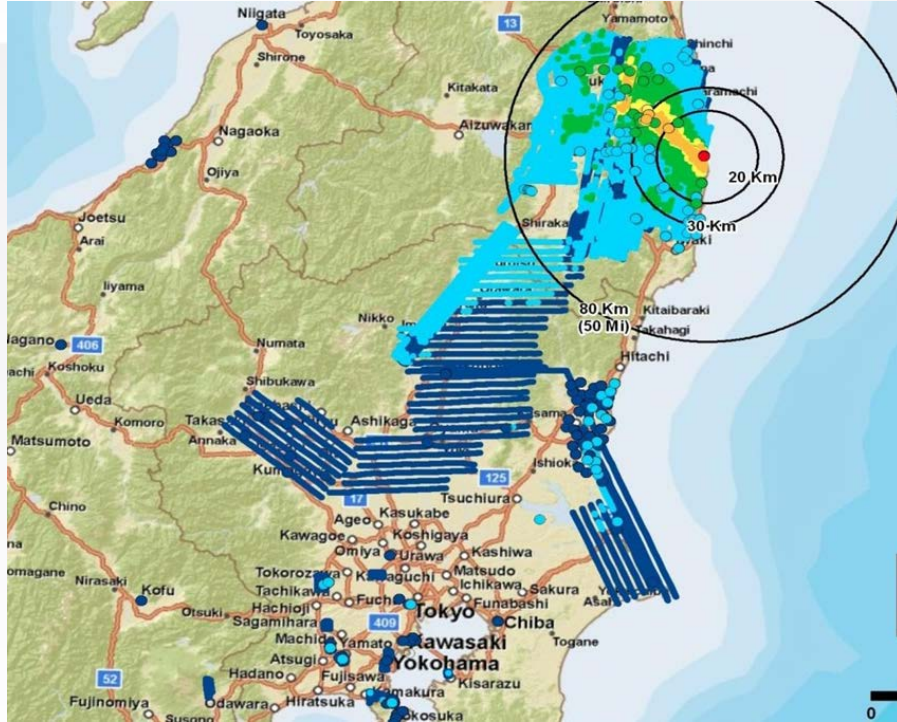

Fusion data

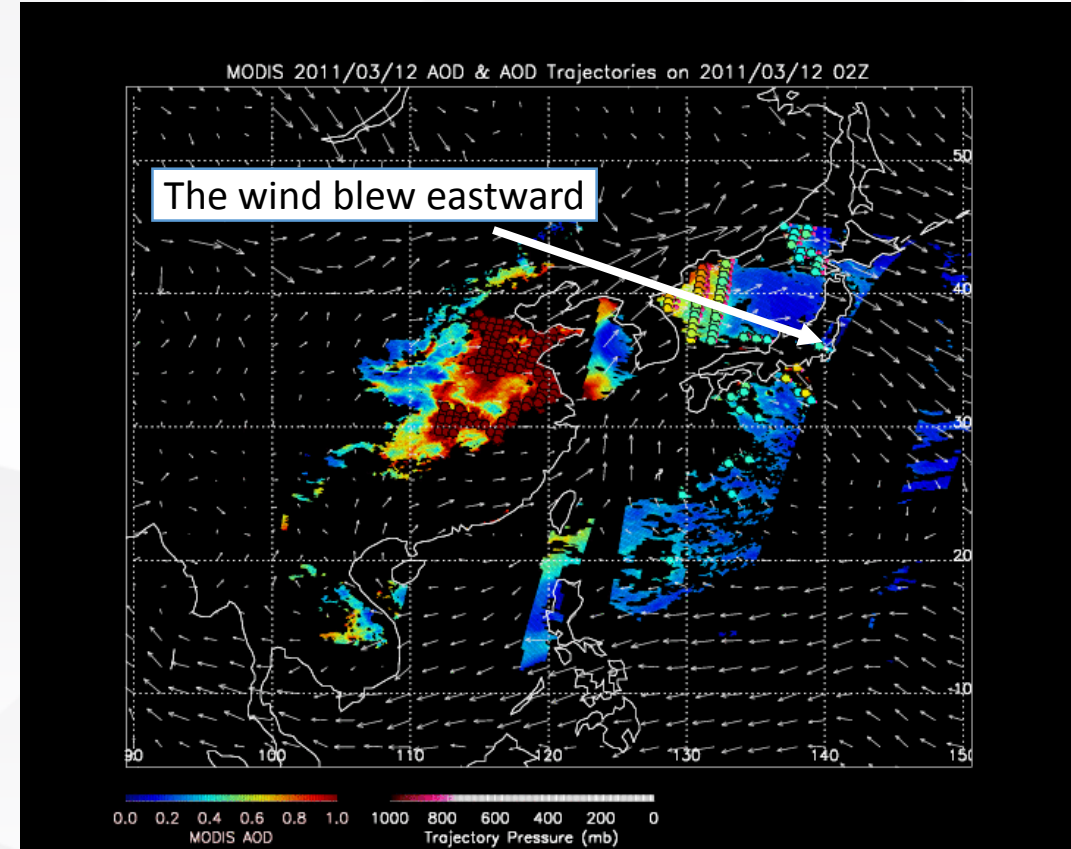

\*HMV: Horizontal Meteorological Visibility

# Research and Application

## Air Quality: Real-time Application of IDEA-I

**Fukushima nuclear disaster in March 2011**

IDEA-I forecast was provided to Shanghai government to make decision for eliminating the panic of people

# Research and Application

## DBCRRAS: Triple typhoon forecast case

**Typhoon Linfa**

**Typhoon Chan-hom**

**Total Precipitation**

**Cloud Top Pressure**

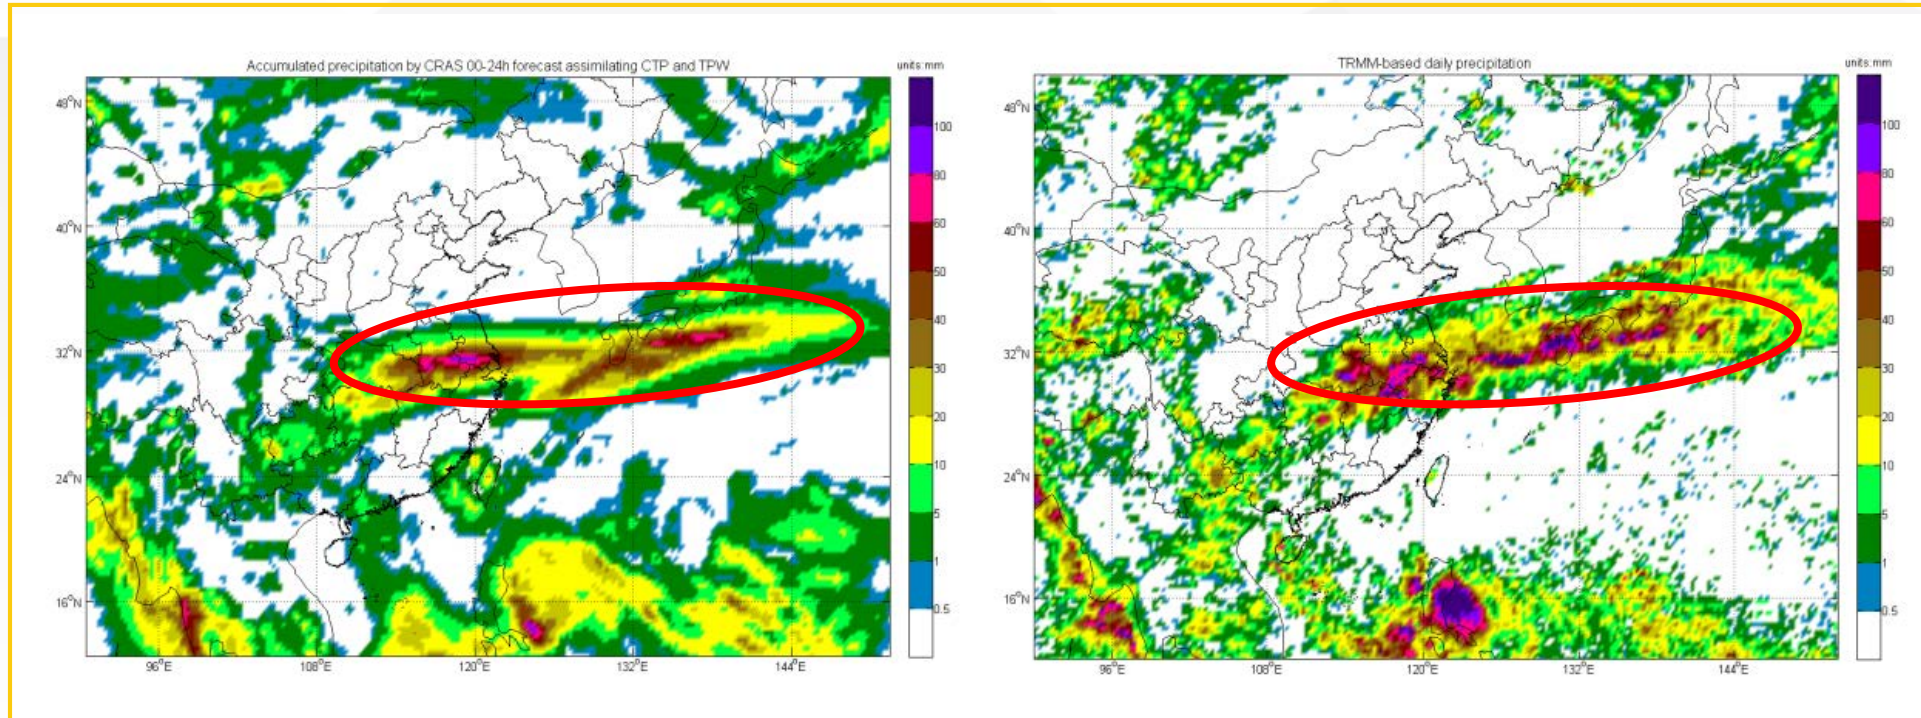

**DBCRRAS 72hr forecast (every 3h) of triple typhoon vorticity, wind, and geopotential height at 500mb; accurately simulate the typhoon Linfa, Chan-hom, and Nangka in real-time**

# Research and Application

## DBCAS: Precipitation Validation

**Forecast of 24h accumulated precipitation compared with TRMM precipitation  
Showing location and intensity are consistent**

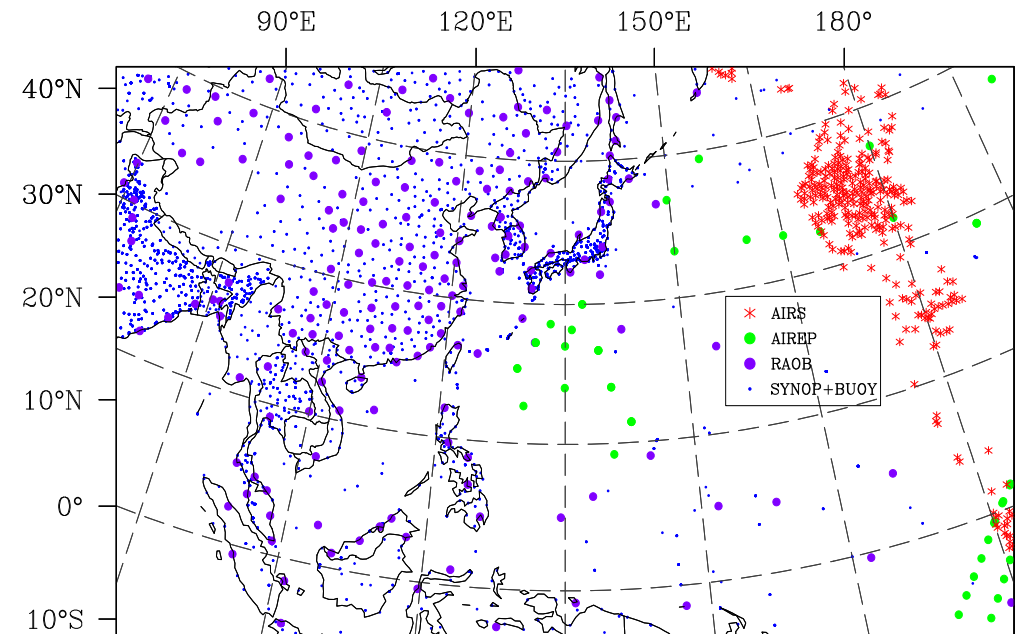

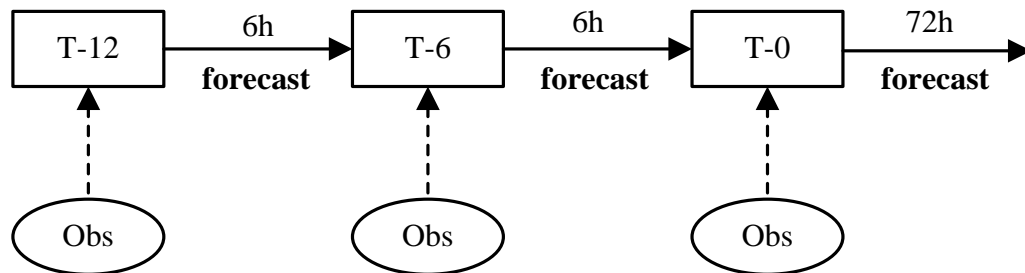

# Research and Application

## AIRS Radiances Assimilation: Model and Domain

Using contemporary data assimilation technique to improve DBCRAS performance

- ✓ Weather Research Forecast (**WRF**) Model
- ✓ Gridpoint Statistical Interpolation (**GSI**)
- ✓ Community Radiative Transfer Model (**CRTM**)

Horizontal Grid resolution: **12km**

Domain size: 917 by 550 by **50**; Model top: **10hPa**

Data: all **conventional** data and **AIRS**

# Research and Application

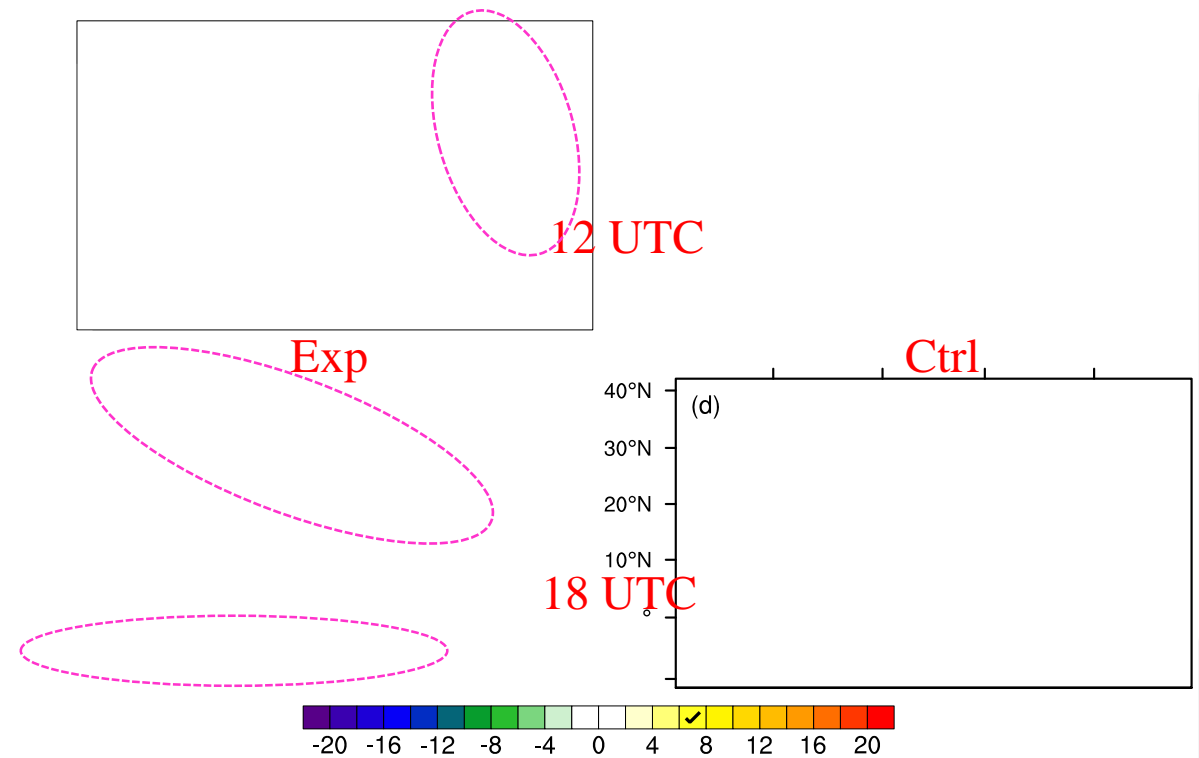

## AIRS Radiances Assimilation: Analysis Increment

Control Run (**Ctrl**): all conventional observations Experiment Run (**Exp**): Control Run + **AIRS**

8 1

500hPa Temperature

850hPa Relative humidity

# Research and Application

## AIRS Radiances Assimilation: Impact on typhoon forecast

Comparisons of 72h **track** and **intensity** forecast for Ctrl and Exp experiment with the best observations from JTWC  
Improved track and intensity forecasts assimilating AIRS radiances

PART3

# Development Plan

# Development Plan

## Integrated Data Acquisition Platform

### Operational Observation

Atmospheric Observation field

### Tower

Gradient Tower

### Ground-based Radiance Instruments

UV sensor-Interferometer-Microwave sounder

To Establish Top-down and Bottom-up Observation Network

# Development Plan

## Cooperation Platforms

**ECNU signed strategic agreement with SMA :  
Promote the conversion  
of research and  
operational application,  
and data sharing**

**Nov. 2015**

**Apr. 2017**

**ECNU signed strategic  
agreement with CMA :  
Priority to support the  
development of  
Atmospheric Science**

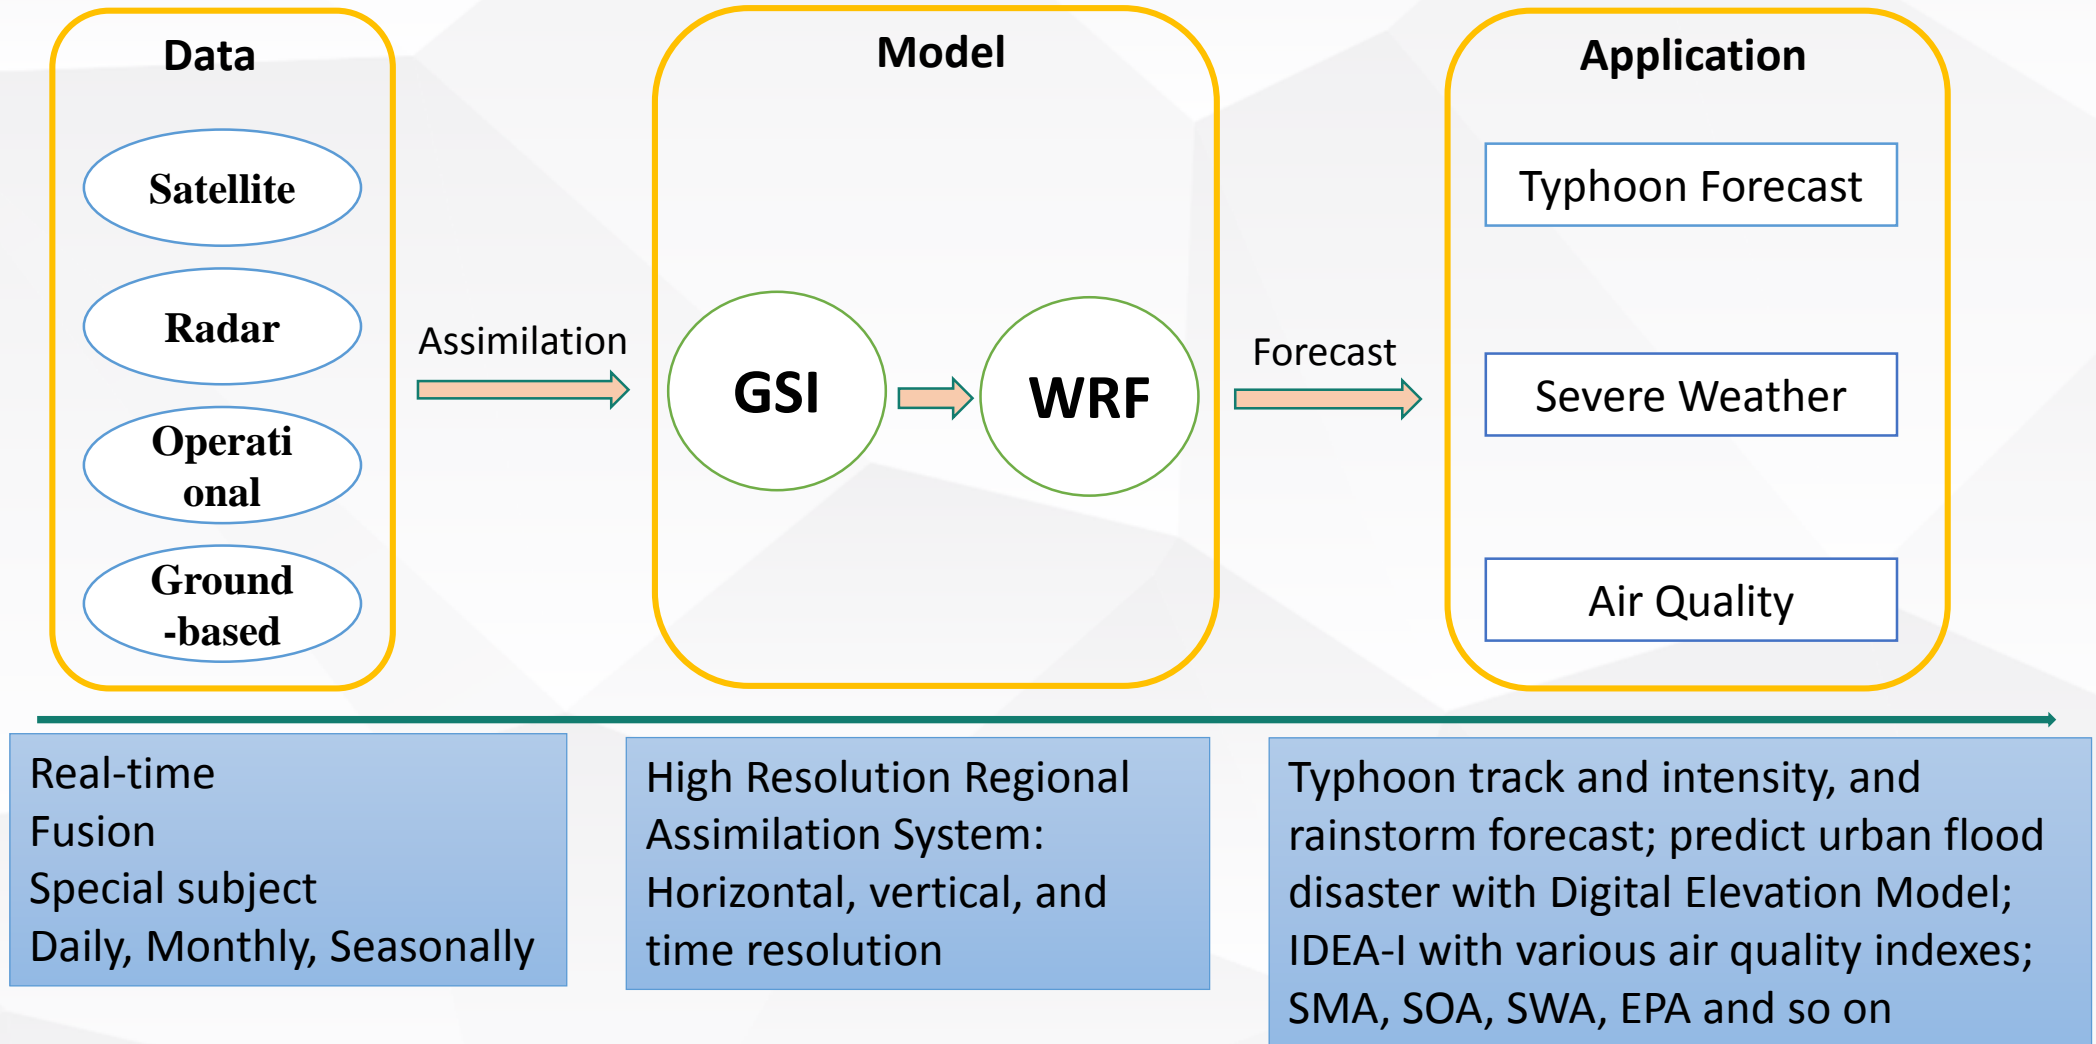

**ECNU founded Institute of  
Atmospheric and Earth  
System Science :  
Atmospheric RS as core  
research direction**

# Development Plan

## Integrated Application Platform

**Thanks for your attention!**
