

First Name	Last Name	Poster Title	Location
James	Anheuser	Investigating Low Earth Orbit Sounder Retrieval Products at Geostationary Earth Orbit Spatial and Temporal Resolution	Row 1
Austin	Balinski	Platinum-modified $\text{Pt}^2\text{-Mo}_2\text{C}$ for improved hydrogenation during ex-situ catalytic fast pyrolysis	Row 1
Cameron	Batchelor	A U-Th chronology of late Pleistocene climate and permafrost conditions at Cave of the Mounds, Wisconsin	Row 1
Sam	Batzli	Web-based Tool for Rapid Burn Intensity Estimates Using VIIRS NDVI	Row 1
Sam	Batzli	RealEarth: Visualize Your Data	Row 1
Miguel	Bernardez	Investigation of convective differences in the East and West Pacific	Row 1
Matilyn	Bindl	Vertical Distribution of CMAQ NO ₂ Over Los Angeles	Row 1
Paul	Block	Uncovering a regime shift in Ethiopian highland summertime precipitation with implications for seasonal prediction	Row 1
Christopher	Bosma	A New Metric To Communicate Tropical Cyclone Rainfall Hazard	Row 2
Melissa	Breeden	Diagnosing North Pacific Blocking with a Linear Inverse Model	Row 2
Zoe	Brooke Zibton	Impact of Adjoint-Derived Optimal Perturbations on Tropical Cyclone Intensity Forecasts	Row 2
Kevin	Burke	Testing Possible Climatic Mechanisms of Vegetation Turnover and Novelty in North America and Europe	Row 2
Brian	Butterworth	Annual Carbon Dioxide Flux over Seasonal Sea Ice in the Canadian Arctic	Row 2
Gavin	Dehnert	Effects of Low, Subchronic Exposure of Commercial 2,4-D Formulation on Early Life Stages of Native Wisconsin Game Fish Species	Row 2
Gavin	Dehnert	2,4-D herbicide formulation DMA4 [®] IVM [®] reduces the cortisol stress response in larval fathead minnows (<i>Pimephales promelas</i>)	Row 2
Russell	Dengel	RealEarth Display	Display
Ankur	Desai	Integrating fine-scale surface flux heterogeneity into observations and land surface models	Row 2
Alyson	Douglas	Observational Evidence of Warm Cloud Invigoration and Aggregation due to Aerosols	Row 3
Steve	Dutcher	Extending Earth-orbiting Satellite Processing Capabilities to the Cloud and Tools Needed to Support This Effort	Row 3

First Name	Last Name	Poster Title	Location
Greg	Quinn	MODIS-VIIRS reflectance comparisons on the Atmosphere SIPS	Row 3
Richard	Dworak	Blended VIIRS and AMSR2 Sea Ice Concentration	Row 3
Ed	Eloranta	Near Zenith Variation of the Lidar Ratio High Spectral Resolution Lidar Observations of Oriented Ice Crystals and Rain	Row 3
Tedward	Erker	Trees in many US cities may indirectly increase atmospheric carbon	Row 3
David	Fastovich	Spatial fingerprint of temperature changes in eastern North America during the Younger Dryas	Row 3
Jonathan	Gero	Atmospheric Emitted Radiance Interferometer	Row 4
Gesangyangji	Gesangyangji	Understanding Aerosol Distribution over Asia from 10 years of Satellite Data	Row 4
Christopher	Gibson	Rapid Air Movement Drill Upgrade Testing	Row 4
Tom	Greenwald	Polarized Radiative Transfer in the CRTM	Row 4
Mat	Gunshor	ABI Imagery: From Beta to Full Maturity	Row 4
Kelton	Halbert	Cold Pool Horizontal Streamwise Vorticity During Tornadogenesis and Maintenance in a Simulated Supercell Thunderstorm	Row 4
Samantha	Hartke	A Probabilistic Landslide Hazard Nowcasting System that Incorporates Satellite Precipitation Uncertainty	Row 4
Jonathan	Henn	Winter climate, fire, and species characteristics affect prairie plant response to climate change	Row 5
Matthew	Hitchman	On the Formation of UTLS PV Dipole/Jetlets in Tropical Cyclones by Convective Momentum Surges	Row 5
Sara	Hotchkiss	Carbon accumulation and storage across interconnected lake-peat ecosystems: A case study from Fallison Bog in Northern Wisconsin	Row 5
Andrew	Kieckhefer	Upgraded satellite observations highlight Weekend Effect	Row 5
Soo Hyun	Kim	Multiproxy reconstructions of paleohydrology in Hawaii over the last 40,000 years	Row 5
Mark	Kulie	Snow Particle Size Distribution and Radar Properties Variability: Regime Dependence	Row 5
Aditya	Kumar	Wildfire Emissions of Atmospheric Pollutants: Global Emission Inventories, Impacts of 2000s-2050s Global Change and Implications for the Arctic	Row 5
Jung Rim	Lee	THE IMPACT OF GOES-16 DATA ON TROPICAL CYCLONE FORECAST; ABI RADIANCE ASSIMILATION BY CONSIDERING THE SURFACE EFFECTS	Row 5

First Name	Last Name	Poster Title	Location
Yinghui	Liu	Status and Validation of S-NPP and NOAA-20 VIIRS Ice Products	Row 6
Yinghui	Liu	Validation of the GOES-R Fractional Snow Cover Product	Row 6
David	Loveless	Improving Boundary Layer Profiling by Augmenting Space-Based Measurements with Ground-Based Interferometers	Row 6
Deming	Meng	The Evaluation of EnVar Method Including Hydrometeors Analysis Variables for Assimilating Cloud Liquid/Ice Water Path on Prediction of Rainfall Events	Row 6
Aronne	Merrelli	Photometric variability of Earth as an Exoplanet Proxy: Insights from DSCOVR and TSS Simulations	Row 6
Aronne	Merrelli	Starshade Imaging Simulations	Row 6
David	Mikolajczyk	AMRC Automatic Weather Station Map 2019	Row 6
Michael	Notaro	Advancing Climate Science Education, Inquiry, and Literacy Across Rural Wisconsin Communities	Row 6
Michael	Notaro	Evaluation of the Representation of Terrestrial Feedbacks Across Sub-Saharan Africa in the CMIP5 Earth System Models	Row 7
Gordon	Novak	Sensitive Detection of Ozone and Nitrogen Dioxide by Oxygen Anion CIMS for Direct Eddy Covariance Measurements of Ozone Deposition to Aqueous Interfaces	Row 7
Luke	Odell	The streamwise vorticity current and dynamic balance: A supercell's vein and life support for developing near-surface vortices?	Row 7
Leigh	Orf	Supercell and Tornado Footage and Animations	Display
Claire	Pettersen	A Composite Analysis of Snowfall Modes from Four Winter Seasons in Marquette, Michigan	Row 7
Claire	Pettersen	Snowfall Modes Diagnosed from GV Observations: Implications for Satellite Snowfall Retrievals	Row 7
Grant	Petty	Sampling Error in Aircraft Flux Measurements Based on a High-Resolution Large Eddy Simulation	Row 7
Juliet	Pilewskie	Investigating the Radiative Response of Convective Organization	Row 7
Pete	Pokrandt	Best of the AOSS Rooftop Camera	Display
Shellie	Rowe	The Destruction of a Stratospheric Potential Vorticity Intrusion due to Inertial Instability in the UTLs as it relates to the 20 - 21 August 2018 Southern Wisconsin Extreme Flooding Event	Row 8

First Name	Last Name	Poster Title	Location
Amanda	Salvi	Comparative study of mesophyll photosynthetic sensitivity and leaf hydraulic conductance to water stress in Eucalyptus	Row 8
Lawrence	Sromovsky	Killing the monster hurricane at the south pole of Saturn	Row 8
Sarah	Stefanos	W2E Slurry Solutions: Making Biogas Systems Work	Row 8
William	Straka	The VIIRS-Aurora SatCam Citizen Science Project	Row 8
Clayton	Suplinski	Exploring Weather Satellites with Virtual Reality and WebGL	Row 8
Mizuhiro	Suzuki	Climate change and economic development: Evidence from Ethiopian manufacturing sector	Row 8
Sila	Temizel Sekeryan	Comparative Global Environmental Impacts of Silver Nanoparticle Synthesis Techniques Using Life Cycle Assessment	Row 9
Jessica	Turner	How Wisconsin Fens Interact with the Atmosphere	Row 9
Eric	Verbeten	Space Science and Engineering Center Mission and Strengths	Row 9
Michael	Vermeuel	Observation and model-based constraints on ozone production along the Lake Michigan coastline: Insights from intensive field experiments and long-term monitoring data	Row 9
Daniel	Vimont	User-relevant climate data for climate impact assessment	Row 9
Daniel	Vimont	The role of noise forcing in generating ENSO diversity	Row 9
Tim	Wagner	Using routine aircraft-based observations to validate satellite-based profile retrievals	Row 9
Pei	Wang	The impact of data latency on local severe storm forecast	Row 10
Peidong	Wang	Synthesis of Tree-Ring Records and Coupled Climate Model Simulations to Understand North Atlantic Hydroclimate Responses to Volcanic Eruptions in the Last Millennium	Row 10
Lily	Weglarek	The influence of Hurricane Maria on soil carbon dynamics in tropical pastures and forests in Puerto Rico	Row 10
Charles	White	Size and Frequency of Deep Convective Clouds in the Tropics Observed from the PATMOS-x AVHRR Record	Row 10
Shu	Wu	Assessing the impact of assimilating atmospheric data on the ocean state estimation and climate forecast in an ensemble coupled data assimilation system	Row 10
Yunheng	Xue	Impact of Satellite Sampling on Monthly Mean TPW Derived from COSMIC, SSMIS and HIRS Observations	Row 10
Guang	Yang	BMA-based adaptive rules for reservoir operation under climate change	Row 10
