

NOAA Listening Session with Dr. Jacobs: Accelerating Research to Operations

Dr. Neil Jacobs

Assistant Secretary of Commerce
for Environmental Observation and Prediction
and NOAA Deputy Administrator

Dr. Jacobs will provide an overview of his NOAA priorities for implementation of the Weather Research and Forecasting Innovation Act of 2017, including improving seasonal to subseasonal forecasting, reducing impacts to extreme weather and water events, and developing a community based global weather model. Ideas to accelerate research to operations, current barriers within the field, data assimilation and future use of cloud computing will also be discussed. This public forum is an opportunity for stakeholders to engage and provide input on these initiatives directly to NOAA leadership.

Monday, November 26, 2018

Union South Varsity Hall

2:00-4:00 pm

2:00 pm - Doors open

2:30 pm - Listening session begins

4:00 pm - Listening session concludes
